DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 and 6-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, and as persuasively argued by the applicant, there is no motivation to combine Ross (US#1975296) in view of the teachings of Duran (US#4655657) as Duran does not pertain to a releasing mechanism. On the contrary, Duran discloses a retaining assembly for a locking bolt which functions to retain the bolt despite missing or damaged components. In any event, even if combinable, Ross in view of Duran fails to disclose the spindle having a collar formed between the largest diameter portion and the large diameter portion of the spindle wherein the roller abuts the collar when mounted to the spindle. Moreover, Ross discloses a washer 12 located at the collar formed between the largest diameter portion 9 and the large diameter portion 8 of the spindle 8,9 such that the roller 1 abuts the washer when mounted to the spindle. Further, even if combinable, Ross in view of Duran fails to disclose the roller can be removed from the mechanism without removing any components from the mechanism. Moreover, the nut 15 of Ross, or the nut 47 of Duran, would require removal prior to the roller being removed from the mechanism.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
